PROFESSIONAL SUMMARY

Senior Software Engineer with eight years of professional experience across enterprise applications and aerospace software. Lead front-end delivery and UX design, maintain shared Blazor components, and build AI-assisted engineering workflows. Combine hands-on development with technical mentorship and cross-functional collaboration.

EXPERIENCE

Springbrook Software, Senior Front-End Software Engineer / Team Lead
January 2022 to Present

- Owned and maintained the shared Design Library for an enterprise ERP platform, building reusable Blazor components and documenting UI standards.
- Led front-end delivery and UX design, partnering with product and engineering teams on interface patterns and mentoring engineers on component design.
- Independently designed and built an AI-assisted pull-request review system in Azure DevOps that identifies code patterns, posts line-level change requests, and tracks and updates findings as code changes.
- Delivered workshops and technical demos on AI-assisted development, prompt engineering, and context management; partnered with leadership on review principles and governance.

Moses Lake Industries, Front-End Web Developer / UX Designer
March 2020 to December 2021

- Built enterprise web applications using Blazor, ASP.NET, and C#.
- Led redesign of 8 applications and development of 8 new applications.
- Established UI standards and technical documentation across 16 projects.

Lockheed Martin (Aeronautics), Software Engineer
January 2018 to January 2020

- Developed flight-subsystem simulation software using Python, C/C++, and Linux.
- Built Qt-based internal automation tools for subsystem integration and testing.

Jackson State University, Undergraduate Student Researcher
2015 to 2017

- Built Timely, a chain-of-custody visualization tool for digital forensics.
- Published research at IEEE SoutheastCon 2019.

SKILLS

Languages: C# · TypeScript · JavaScript · HTML/CSS/SCSS · Python
Frameworks: .NET · Blazor · Bootstrap · Syncfusion
Architecture: Design systems · Component libraries · Accessibility practice · Design tokens · UX engineering
DevOps: Azure DevOps · Git · CI/CD pipelines
AI & automation: Claude · GitHub Copilot · AI-assisted code review · Workflow automation

EDUCATION

B.S. in Computer Science, Jackson State University (2013 to 2017), Cum Laude (3.57 GPA), Presidential Scholarship, W.E.B. Du Bois Honors College.
